

POTATOES IN PRACTICE 2015

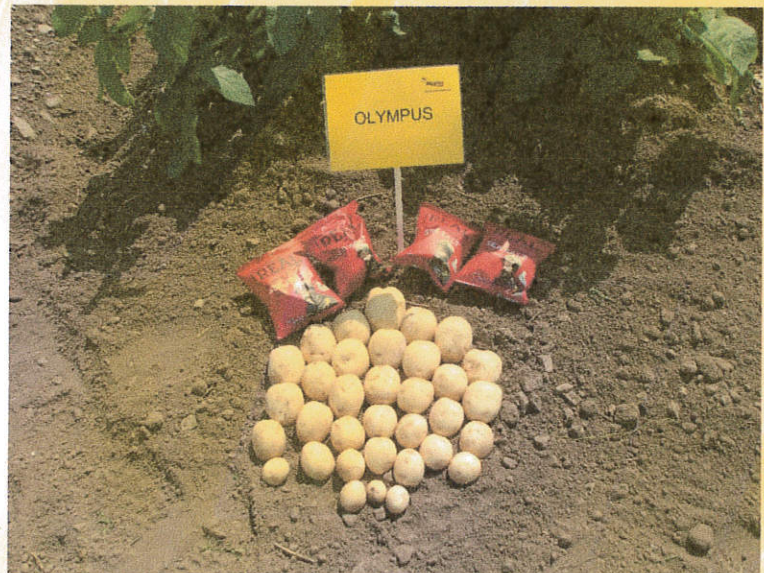

Promoted as the largest field based potato event in the UK, 13th August saw the return of this annual event in Dundee.

The weather was fine which allowed visitors to spend more time outdoors examining the various seed plots and the working demonstrations.

We had 8 varieties on show displaying the full range of our variety development.

A talking point was the display of crisps manufactured from our variety Olympus, a low acrylamide producing variety which is accepted by all major processors.

AHEAD OF THE FIELD

We also showed a numbered variety destined for the chip sector which we believe has both resistance and tolerance to PCN. It is currently undergoing independent trials to confirm this.

Bremner is a high yielding table variety with excellent skin finish and a high proportion of bakers for the catering and retail trade.
