BREMNER

PURELY POTATOES

Family business – family values

Bremner

Bremner is an early maincrop general purpose variety.

It produces shallow-eyed oval tubers with white skins and flesh. These are suitable for boiling, steaming or baking.

This variety has achieved high yields over several years in trials in the Mediterranean and North Africa.

Tests have shown excellent resistance to dry rot and black dot. This variety also has good resistance to potato leafroll virus, tuber late blight and tuber splitting.

| Description | |
|--------------------|---|
| Origin | Remarka x Mondial |
| Maturity | Early Maincrop |
| Tubers | Oval tubers with shallow eyes White skin and flesh |
| Consumer Quality | General purpose table variety |
| Agronomic Features | High yielder with good disease resistance and suited to warm climates |

| Diseases, Pests and Damage | | | |
|----------------------------|---|-----------|---|
| Common Scab | 6 | Black Dot | 7 |
| Skin Spot | 8 | Bruising | 8 |
| Dry Rot (F coeruleum) | 8 | Spraing | 8 |
| Blackleg | 6 | Bruising | 5 |
| Tuber Blight | 6 | Splitting | 6 |
| PLRV | 6 | | |

Note : Scale of 0-9. High numbers equate to high resistance, low numbers equate to low resistance to pathogens or pests. R=resistant, S=susceptible.
