SAFIYAH

PURELY POTATOES

Family business – family values

Safiyah

This is one of the highest yielding potato varieties to come through recent trials.

It possesses excellent drought tolerance and is highly resistant to blackleg, common scab, dry rot and virus A.

It produces bold tubers with good skin finish suitable for table use.

A variety well adapted to developing markets in challenging climates and to the changeable weather patterns in Europe.

Low nitrogen requirement also makes it environmentally friendly.

Description	
Origin	Ofabula x Felsina
Maturity	Early Maincrop
Tubers	Bold tubers with bright skin finish
Consumer Quality	High yielding table variety
Agronomic Features	Drought resistant, very high yielding variety with low input requirements

Diseases, Pests and Damage			
Foliar Blight	2	PLRV	5
Common Scab	6	G Rostoch	7
Powdery Scab	3	G Pallida (1)	-
Gangrene	9	G Pallida (2,3)	2
Blackleg	8	Internal Damage	5
PVY	1	External Damage	2

Key: Scale of 0-9. High numbers equate to high resistance, low numbers equate to low resistance to pathogens or pests. R= resistant, S= susceptible.
